Flood risk assessment

The attached plan provided by the Environment Agency does not produce a clear cut picture of how it affects my clients' site and this precludes the opportunity to make meaningful preventative measures.

I am not sure if the site is protectd by the Defence Works or whether the flood plan encircles it.

My 1:500 block shows a ditch on the southern boundary of the site but the Flood plan shows it as a main river.

My clients are anxious to include appropriate preventative works for their property so may I suggest that the Environment Agency's comments on the proposal are made known to me so that I can lodge suitable proposals.
