CLIENTS REQUIREMENTS

The clients proposals required provision for level wheelchair access throughout the property and 4 bedroom family accommodation.

DESIGN

The requirements are achieved by concentrating the 4 bedrooms in the existing bungalow with a new larger bathroom and increasing the width of the corridor and bedroom doors to suit.

The existing front entrance is replaced with a new entrance on the west elevation suitable for wheelchair access with direct access to the open plan living area and kitchen in the new single storey extension.

The proposals retain the character and scale of the existing with minimum impact on the neighbouring properties.
