

Stephen,

I am satisfied the proposals secure the retention of the historic boundary wall and the cosmetic treatment proposed will address the scarring and (hopefully) address neighbour concerns. The repair of the boundary wall adj to the garage goes further than I suggested (which was to simply remove the hard render) – now involving part reconstruction in matching second hand brick. From my earlier discussions with the contractor and the specification I feel he has sufficient knowledge and expertise of traditional mortars to carry out the work satisfactorily. On this basis I feel condition 3 can be discharged based on what has now been presented.
