Brick plinth

This architectural drawing shows a side elevation of a building. The structure features a gabled roof with a chimney on the left side. The facade is composed of two main sections: a lower section with a flat roofline and an upper section under the gable. The lower section has a series of windows: on the left, a tall window with a decorative hood, followed by three smaller windows, and a larger window at the bottom; on the right, four smaller windows are arranged vertically. The upper section, under the gable, contains two large windows on the left and two smaller windows on the right. The drawing uses fine lines to represent siding or brickwork and includes decorative elements like shutters and a hood over one of the windows.
