APPENDICES

- A Proposed Site Plan**
- B Bus Timetables**

1.0 INTRODUCTION

- 1.1 The Stilwell Partnership has been instructed by Hayling Island Builders Ltd to produce a Travel Plan Framework (TP) for the proposed mixed use development at Station Road / Furniss Way, Hayling Island. The location of the site is shown in **Figure 1**, below.

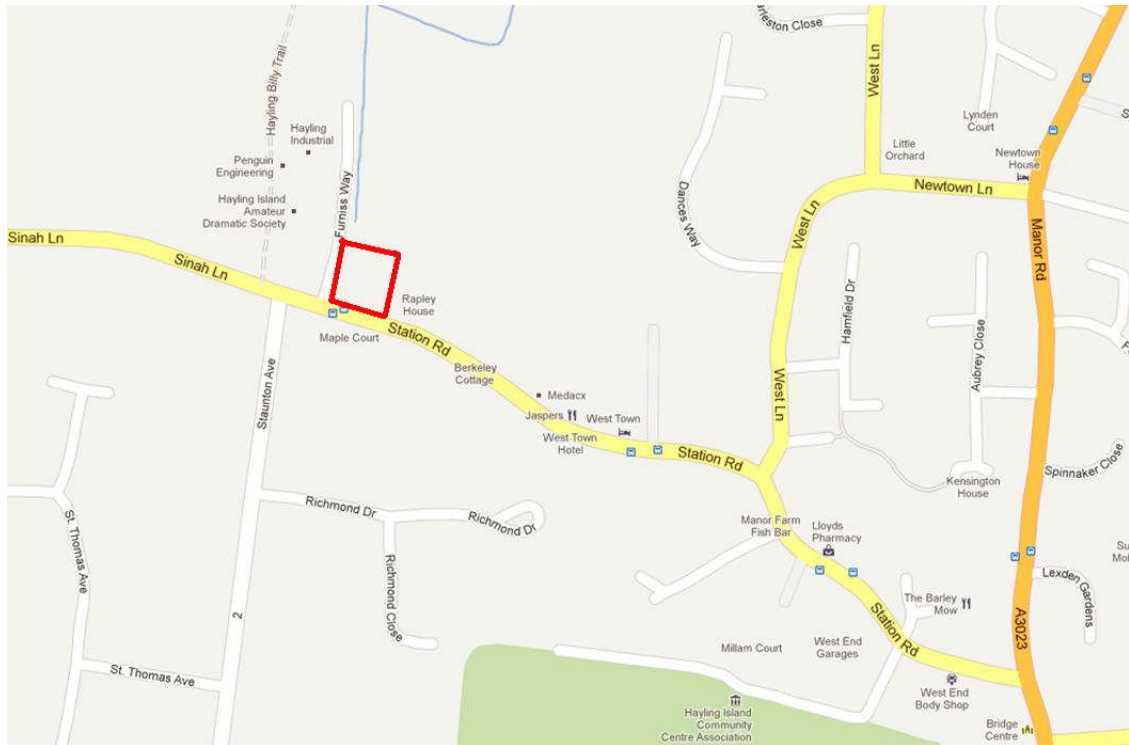

Figure 1

- 1.2 A TP has been prepared for Hayling Island Builders Ltd in order to provide the proposal with a means by which to effectively manage the transport needs of the residents, staff and visitors to the development. The TP is not intended to be anti-car, but will detail the alternative modes of transport available as much as possible. The TP is designed to encourage residents, staff and visitors to use cars more efficiently where necessary, whilst providing incentives to use alternative modes of transport.
- 1.3 It is recognised that in order for the Travel plan to be successful, it is vital that the Developer incorporates the recommendations into the scheme and undertakes the “Measures” as detailed in **Section 9.0** of this report.

2.0 BACKGROUND AND EXISTING & PROPOSED DEVELOPMENT

Existing Site

- 2.1** Currently the site is an area of unused agricultural land, accessed via a gated entrance on Station Road, adjacent to the buildings merchant. The existing access is very overgrown and is not currently in use. The site itself covers approximately 2.4 hectares of land. The site location can be seen in **Figure 1** above.

Site Location

- 2.2** The site is located on Station Road, which links to the main 'A' road on the island (A3023), approximately 500m east of the proposed development site. The A3023 provides an excellent link to Havant and the main motorway network. The majority of the local roads are quiet residential roads, which offer safe opportunities for walking and/or cycling due to the low volumes of traffic for the majority of the year.
- 2.3** Station Road offers a wide variety of local amenities including shops (such as tesco express and grocers), a pharmacy, a butchers, take-aways, cafes, pubs and restaurants. All of which are in walking distance. In the vicinity of the proposed development site, Station Road is subject to 30mph speed limit, with many drop kerbs providing access to driveways and crossing points. Double yellow lines are in place along its length, with bus stops available just outside the proposed site.
- 2.4** Furniss Way is a small access road serving a small industrial estate only, the road is a cul-de-sac and serves just 9 industrial units.

Site Proposals

- 2.5** An application for outline planning permission is due to be submitted for the proposal to erect a mixed use development within a plot of un-used agricultural land. The development will consist of 60 new houses with private gardens and parking and 7 small light industrial units (B1 (C)) which will be constructed within 2 new buildings providing a total floor area of 12,500 sq. ft.
- 2.6** The housing development will be accessed via a new access road situated along Station Road, with 2 car parking spaces available per dwelling, with an additional 2 spaces for visitors. The industrial area of the site will be accessed via a new access road situated along Furniss Way, which will be in keeping with the current street scene. A Proposed Site Plan can be seen in **Appendix A**.

Car Parking

- 2.7** As stated above, the new proposal will include parking in line with Havant Borough Council Core Strategy, and 120 car parking spaces will be provided to serve the residential area with an additional 2 visitor spaces to serve the residential development. Currently the two visitor spaces will be located on the access road for general use, although there is potential to accommodate more spaces for visitor use at a later stage. The industrial units will be provided with 28 parking spaces which is in line with the core strategy (which is 1 space per 45m² as recommended).

Cycle Parking

- 2.8** Cycle parking will be provided in line with Havant Borough Council and 2 spaces per residential unit will be provided, every dwelling will have a private rear garden of which cycle storage will be provided within. The industrial units will be provided with a cycle rack to the front of the property, with space for up to 5 cycles.

3.0 PLANNING POLICY CONTEXT

- 3.1** This section of the report provides a summary of the policy documents which are relevant to the proposed development at Station Road, Hayling Island. These include: The Transport White Paper 'Creating Growth, Cutting Carbon', National Planning Policy Framework 2012 and Havant Borough Council Core Strategy.

TRANSPORT WHITE PAPER – CREATING GROWTH, CUTTING CARBON (JANUARY 2011)

- 3.2** 'Creating Growth, Cutting Carbon' sets out the government objectives for a greener and safer transport network that encourages economic growth and improves quality of life for communities.
- 3.3** The White Paper encourages the implementation of sustainable local transport systems and aims to remove the previous top-down approach to transport planning. Local Authorities will have the power to implement and tailor transport systems and schemes based on local needs and behaviour.
- 3.4** The economic aims of the White Paper can be achieved by increasing access to employment and services, reducing carbon emissions, increasing public transport accessibility, and as a by-product, increasing the number of people using safer transport methods with wider health benefits.
- 3.5** The White Paper notes the key role of travel planning in achieving government objectives, as set out below:

"The Government wants to encourage and enable more sustainable transport choices. [...] In transport terms, this might be exemplified by reducing unnecessary signs, posts and other street clutter to improve road safety and encourage walking, by travel planning, or by presenting information in such a way as to encourage choice"

- 3.6** Successful travel planning schemes are noted and used as examples within the White Paper, including Travel Planning for Schools, Cycle Journey Planning and Area-Wide Travel Planning. At Cambridge Science Park an initial investment of £70k brought about £200k benefits and a 5-6% reduction in journey times. The success shown in the White Paper Case Studies should be used to encourage the implementation of other travel planning schemes.

NATIONAL PLANNING POLICY FRAMEWORK (2012)

3.7 On the 27th March 2012 the National Planning Policy Framework was published, which sets out the Governments planning policies for England. The new document is a key part of the Governments reforms to make the planning system less complex and more accessible, to protect the environment and to promote sustainable growth.

3.8 The Core Planning Principles of the National Planning Policy Framework (NPPF) are to:

- Be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area;
- Not simply be about scrutiny, but instead be a creative exercise in finding ways to enhance and improve the places in which people live their lives;
- Proactively drive and support sustainable economic development to deliver the homes, businesses and industrial units, infrastructure and thriving local places that the country needs;
- Always seek to secure high quality design and a good standard of amenity for all existing and future occupants of land and buildings;
- Take account of the different roles and character of different areas, promoting the vitality of our main urban areas;
- Support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change and encourage the reuse of existing resources;
- Contribute to conserving and enhancing the natural environment and reducing pollution;
- Encourage the effective use of land by reusing land that has been previously developed, provided that it is not of high environmental value;
- Promote mixed use developments and encourage multiple benefits from the use of land in urban and rural areas, recognising that some open land can perform many functions;
- Conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations;
- Actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling and focus significant development in locations which are or can be made sustainable;
- Take account of and support local strategies to improve health, social and cultural wellbeing for all and deliver sufficient community and cultural facilities and services to meet local needs.

3.9 PPG13 has also been withdrawn and replaced by the NPPF. In Paragraph 29 of the NPPF, it states that “the transport system needs to be balanced in favour of sustainable transport modes, giving people a real choice about how they travel. However, the Government recognises that different policies and measures will be required in different communities and opportunities to maximise sustainable transport solutions will vary from urban to rural areas”. They state that plans and decisions should take account of whether:

- The opportunities for sustainable transport modes have been taken up depending on the nature and location of the site, to reduce the need for major transport infrastructure;
- Safe and suitable access to the site can be achieved for all people; and
- Improvements can be undertaken within the transport network that cost effectively limits the significant impacts of the development. Development should only be prevented or refused on transport grounds where the residual cumulative impacts of development are severe.

3.10 It also states that developments should be located and designed where practical to:

- Accommodate the efficient delivery of goods and supplies;
- Give priority to pedestrians and cycle movements, and have access to high quality public transport facilities;
- Create safe and secure layouts which minimise conflicts between traffic and cyclists or pedestrians, avoiding street clutter and where appropriate establishing home zones;
- Incorporate facilities for charging plug-in and other ultra-low emission vehicles; and
- Consider the needs of people with disabilities by all modes of transport.

3.11 HAVANT BOROUGH COUNCIL CORE STRATEGY

Policy CS9 Housing - Planning permission will be granted for housing proposals that will: -

1. Contribute to achieving a net total of 6,300 new dwellings between 2006 and 2026.
2. Deliver on average 30-40% affordable housing on sites of 15 dwellings (gross) or more and secure a suitable contribution, or on-site provision, equivalent to on average 30-40% on smaller housing developments between 5 and 14 dwellings (gross), unless a lesser requirement has been transparently justified on viability grounds.
3. Ensure mixed communities are created through the planned distribution and avoidance of a concentration of affordable housing.
4. Achieve a suitable density of development for the location, taking into account accessibility to public transport and proximity to employment, shops and services in addition to respecting the surrounding landscape, character and built form.
5. Provide a mix of dwelling types, sizes and tenures which help meet identified local housing need and contribute to the development of mixed and sustainable communities.
6. Provide accommodation for the ageing population in sustainable locations, taking account of the need to provide for a variety of care needs and flexibility to accommodate differing requirements of ageing care.
7. Contribute to achieving 450 extra-care dwellings between 2006 and 2026.
8. Ensure housing development is delivered in a phased manner with an appropriate proportion of previously developed land so as to avoid unnecessary development on greenfield urban extension sites.

Policy CS17 Concentration and Distribution of Development within the Urban Areas - Development will be permitted that makes the most effective use of land in the borough by granting planning permission that:

1. Concentrates new housing, employment, retail, leisure and other development within the five urban areas of Havant, Leigh Park, Waterlooville, Emsworth and Hayling Island, as shown on the Proposals Map.
2. Prioritises development on previously developed land, including redundant, derelict or underused land and buildings within the urban area.
3. Broadly distributes the new housing and employment development in the five areas of the borough as indicated on the Spatial Distribution Map (Key Diagram). Development in the non-urban areas will only be permitted if it is consistent with the policies for the countryside set out in national policy.

Policy CS20 Transport and Access Strategy - Development will be permitted that:

1. Is consistent with and contributes to the implementation of the 'Reduce, Manage and Invest' strategy.
2. Does not increase congestion and promotes better use of existing transport networks.
3. Improves accessibility to goods, services and employment and promotes equality in the transport system.
4. Provides transport management measures to ensure the safe and efficient operation of the strategic and local road network.
5. Ensures that highway design responds positively to the characteristics of the area and delivers a high quality public realm for all users.
6. Maintains or improves the range of transport modes accessible to the users of the development site with specific emphasis on public transport, especially high quality/frequency buses and includes walking and cycling where appropriate.
7. Improves highway, cycling and pedestrian links between the western built up area of the borough (Waterlooville) and the eastern area of the borough (centred on Havant) to create a strong east/west communication axis that passes through Dunsbury Hill Farm/Leigh Park.

Policy CS21 Developer Requirements - Development will be permitted if on-site and/or off-site infrastructure requirements are met. Where new or improved infrastructure is essential for planning permission to be granted the council will require the on-site or off site provision and/or contributions through planning obligations, agreements or tariffs in accordance with the relevant legislation for off-site provision. The need for contributions will depend on information and advice from infrastructure providers on the expected impacts of the development on all the infrastructure types. Where appropriate the council will seek on-site provision or financial contributions to ensure the timely off-site or on-site delivery of all types of infrastructure as detailed in Table 9.1 under the following headings:

1. Transport
2. Housing
3. Education
4. Health
5. Social Infrastructure
6. Green Infrastructure
7. Public Services
8. Utility Services
9. Flood Defences
10. Public Realm

Where on-site provision or financial contributions are made, arrangements for the ongoing maintenance of facilities will be required. Where the necessary contributions are not agreed by the developer, planning permission will be refused.

A Supplementary Planning Document will be prepared setting out the mechanisms that will be used for taking development contributions together with details of the types and priorities of infrastructure provision.

DM13 Car and Cycle Parking on Residential Development - Residential development will only be permitted where it provides car parking and cycle storage in accordance with the standards set out in the Residential Car Parking and Cycle Provision Supplementary Planning Document.

HAMPSHIRE COUNTY COUNCIL 'GUIDE TO DEVELOPMENT RELATED TRAVEL PLANS' (2009)

3.12 Hampshire County Council seeks the effective use of travel plans to achieve the following;

- Ensuring that development takes place in locations and in ways that minimise the impact of this additional demand;
- Increasing accessibility and ensuring that opportunities are provided for people to travel to and from the site in a variety of ways;
- Reducing dependence on the use of the car.

4.0 SITE ACCESSIBILITY / ASSESSMENT

Pedestrians

- 4.1** New footways will be provided for the two new access roads. The access situated on Station Road will serve the residential development only and a new footway is proposed from the new access road to the Furniss Way junction, improving the pedestrian route to the bus stop. Footways will also be provided throughout the development site. A new crossing point with tactile paving is also proposed on Station Road, adjacent to the site. The pedestrian access to the industrial units will be via Furniss Way.
- 4.2** The nearest Bus Stops are located along Station Road, adjacent to its junction with Furniss Way.
- 4.3** For pedestrians without mobility impairment, the Institution of Highways and Transportation (IHT) in their publication, 'Guidelines for Providing for Journeys on Foot 2000' make a series of suggested acceptable walking distances in relation to some common facilities. **Table 1** below, sets out suggested acceptable walking distances in relation to some common facilities.

Table 1 – Suggested Acceptable Walking Distances

	Town Centres, Retail	Employment, School, Tourism	Elsewhere
Desirable	200m	500m	400m
Acceptable	400m	1,000m	800m
Preferred Maximum	800m	2,000m	1,200m

- 4.4** It has been identified that there are shopping areas located along Station Road, offering high street style shops, banks, post office and supermarkets. These include Tesco express, a pharmacy, a butcher and grocers, plus numerous takeaways, cafes and restaurants.
- 4.5** Hayling Park playing fields and Hayling Island community centre are located to the south of Station Road, offering a large number of sporting and leisure activities, such as football, tennis, cricket, basketball and bowls. The Station theatre group is located on Station Road adjacent to its junction with Furniss Way.
- 4.6** The Hayling Island 'Billy Trail' provides a predominately car free cycle and pedestrian route between the site and Havant (approximately 5 miles north). This route is well maintained and consists of compacted gravel and it follows a flat route for easy cycling and walking.

4.7 In accordance with the development brief, a new footway will be provided along Station Road to link the current access into Furniss Way.

4.8 In terms of geographical location, it is clear that the site is well located for pedestrian accessibility to a wide range of local amenities and facilities.

Cyclists

4.9 It is generally accepted that for a distance of up to around 5,000m, 'cycling can reasonably be considered as an alternative to travelling by private car'. On the basis of a relatively slow cycling speed of 15kph, this distance could be achieved in 20 minutes.

On Site provision

4.10 Cycle parking spaces will be provided for the residential element, in line with Havant Borough Council requirements.

Buses

4.11 The development site is served by two bus services (30 and 31) which stop adjacent to the proposed site. These services connect to and from Havant Bus / Railway Station and therefore provide excellent commuter links to Portsmouth, Southampton, Chichester and the surrounding employment areas / schools. The IHT document 'Guidelines for Public Transport in Developments' dated March 1999, states that the maximum walking distance to a bus stop should not exceed 400m and preferably be no more than 300m. Clearly, the bus stops closest to the development site comply fully with these criteria.

4.12 Below is a brief summary of the bus services as mentioned above and timetables are included in **Appendix B**.

Service 30 – Havant – West Hayling – Eastoke - Havant

4.13 With buses running from 06:40 to 20:45 every day, there are services every 30 minutes throughout the day. Destinations include: Havant Bus Station, Langstone High Street, Mill Rythe School, Beachlands Bus Stand, Sea Front Post Office and Hayling School.

Service 31 - Havant – West Hayling – Eastoke - Havant

4.14 With buses running from 05:57 to 18:15 every day, there are services every 30 minutes throughout the day. Destinations include Solent Road Havant (Tesco), Sandy Point Nature Reserve, Sea Front Estate, West Town Barley Mow, Highworth Caravan Park and The Oven Campsite Hayling.

Trains

- 4.15** Havant mainline railway station can be easily reached via the bus services that run close to the site, and provides services between Brighton, Horsham, Portsmouth, Southampton and London Waterloo.

Hayling Ferry

- 4.16** Hayling Ferry is located 1.5 miles west of the proposed site, provides frequent crossing to / from Eastney (Portsmouth). The ferry runs 7 days a week and provides an excellent service for school children and commuters. It also provides leisure and shopping opportunities. The roads towards the ferry terminal are very lightly trafficked and are popular with cyclists.

Summary

- 4.17** Taking into consideration the objectives of NPPF 2012, together with the good public transport network, we consider that the surrounding infrastructure for this development is very good in providing excellent links to local shops, facilities and attractions.

5.0 TRAVEL SURVEYS

- 5.1** The co-ordinator will carry out regular monitoring of the plan through staff, resident and visitor questionnaires, and the associated reporting of funding to the local authority. The Travel Plan surveys will be I-TRACE compliant and all surveys will be undertaken in accordance with the I-TRACE survey tool. See **Section 10.0 (Monitoring and Reviewing)** for further details.
- 5.2** The Final TP will be prepared and submitted to Havant Borough Council within 6 months of first occupancy of the residential development and light industrial units, in order that the surveys can be undertaken and analysed in the first instance.

6.0 OBJECTIVES, TARGETS & BENEFITS

6.1 Objectives

The TP is a permanent document and ongoing strategy for enabling and encouraging travel by environmentally sustainable modes of transport.

6.2 The specific aims are:

- To encourage a reduced reliance on the car through the reduction in the length and number of motorised journeys, particularly those journeys undertaken in single occupancy vehicles;
- To promote the use of alternative means of travel which are more suitable and environmentally acceptable;
- The plan will also inform residents, staff and visitors of sustainable travel options in an attempt to encourage an increase in the use of such modes.

Targets

6.3 Targets will be set to assess the success of the scheme. The Targets need to be realistic, taking into account the existing situation and information gathered through the initial staff, residents and visitor travel surveys. The setting of exact targets and a timescale for their achievement would result from the initial stage of the Travel Plan once implemented.

6.4 Targets in line with general recommendations will be 'SMART' – i.e. Specific, Measurable, Achievable, Realistic and Time Bound. Examples of defined targets may include:

- Vehicle Trip Reduction
- Single occupancy vehicle trip reduction/increase in multi-occupancy vehicle trips
- Reduced vehicular travel (veh km)
- Increased in modal share or change in modal split between travel modes
- Number of car sharing trips/members.

6.5 The Travel Plan will detail the timescale by which the targets are to be achieved. This information will be provided (in the form of the final Travel Plan) once the initial staff and visitor travel surveys have been carried out. The final travel plan and travel plan information packs will be presented as two separate reports, one for the residential aspect of the development and one for the industrial aspect of the development.

6.6 Based on the findings of staff, resident and visitor surveys and the Site Accessibility Audit, a range of options will be promoted as part of the Travel Plan. These will include the promotion of public transport, cycling and walking.

6.7 On site promotion of the plan will be by the means of travel information and Travel Plan initiatives being displayed or made available within the communal entrances of the site and / or within an information pack for the initial residents and first occupancy of the light industrial units. Sustainable travel information will also be made available to visitors via promotional literature, or the company's website.

6.8 This information will include details of public transport services, cycle, and pedestrian facilities.

Objectives

6.9 The objectives of the TP are:

- To encourage walking;
- To encourage cycling;
- To encourage the use of public transport;
- To limit travel to the development by car to a level that can be accommodated by the proposed parking facilities;
- Where it is necessary to use the car, to encourage its more efficient use.

Benefits

6.10 The introduction of a TP for the proposed development will:

- Strengthen environmental performance and improve the environmental image of the new development;
- Provide equal opportunities by providing such travel incentives which are available locally and supporting those occupants without access to a car;
- Make development sites less congested and more easily accessible, improving relations with the local community and enabling deliveries to move more freely;
- Offer wider travel choices to workforce;
- Help residents, staff and visitors to be healthier and fitter;
- Achieve Carbon Reductions and enhance environmental credentials;
- Cost savings for the business through reduced travel expenses (car parking charges, congestion charges etc).

7.0 TRAVEL PLAN MANAGEMENT

- 7.1** The nominated co-ordinator will have the power to make relevant financial commitments on behalf of the client. The responsibilities of the Travel Plan Coordinator and the Developer for the specific measures that are proposed are set out in **Section 9.0 (Committed Measures)**.
- 7.2** It is important to inform residents, staff and visitors of the existence and benefits of the TP. It will be necessary to hand out a TP pack to all residents / industrial unit staff and it will also be beneficial to display relevant information in prominent locations where it is easily viewed, such as, on notice boards and websites/intranet. The industrial units will promote the benefits of the TP to visitors on its noticeboards.
- 7.3** It is essential to listen to people's views about the TP and its initiatives. It will be necessary to collect feedback which will be achieved by placing suggestion boxes near to where the information is displayed, as well as by the formal monitoring process as detailed later.
- 7.4** Regular liaison with HBC and the local bus operators will also be necessary.

Co-ordinating and Communicating the Plan

- 7.5** To ensure that the TP is monitored and that effective communications are maintained with residents, staff and visitors, the Developer should aim to:
- Appoint a Travel plan co-ordinator (this could be a member of the existing staff base) to be responsible for co-ordinating, progressing the individual elements of the TP, and be available to liaise with other colleagues.
 - Travel plan co-ordinator duties to include the promotion of the benefits of the Plan and resource the post to achieve this.
 - Ensure the Travel plan co-ordinator determines and maintains such records as are necessary to monitor the effect of the TP and to adjust it as necessary to achieve the objectives.
- 7.6** The TP set out here should be developed into a document that can be used to communicate effectively the aims and objectives to residents, staff and visitors.

8.0 PROMOTION OF SUSTAINABLE TRANSPORT

Public Transport Information

- 8.1** Timetables, maps and other information on the Bus and Rail Services will be displayed at the entrances to the buildings and given on websites (where applicable).
- 8.2** There is also a wealth of information available over the internet, including:
- www.nationalrail.co.uk and www.thetrainline.com provide information on public train services.
 - www.traveline.org.uk, www.hants.gov.uk and www.easthants.gov.uk provide information on all modes of public transport services.
- 8.3** Access to this information will be made available wherever possible, particularly over local community websites.
- 8.4** The use of journey planners such as Route and Network Rail Journey Planner will be encouraged.

Walking

- 8.5** Walking will be encouraged as much as possible. This encouragement can be linked to health campaigns. It has been identified that there are a good range of amenities within a short walking distance of the site.
- 8.6** The site location indicates that there is a wealth of services within walking and cycling distance and therefore these modes of transport could be used by many local residents, staff and visitors; this can be promoted in future health campaigns.
- 8.7** The TP Co-ordinator will liaise with HBC to make sure that all footways and pedestrian routes are maintained.

Cycling

- 8.8** The development will have cycle parking facilities at the site. Cycling will be encouraged as much as possible, and can be linked to health campaigns.

8.9 The TP Co-ordinator will set up a Bicycle User Group (BUG) for the site, which will be able to liaise with local cycle shops and investigate the potential for discounts. Setting up a BUG will also allow staff to benefit from better cycling facilities, social riding, free maps, leaflets and advice.

8.10 All cycle route information available will be displayed for staff and visitors to observe at the entrance to the buildings on notice boards or similar.

Car Sharing

8.11 If ever required, car sharing for staff travelling to the site will be encouraged.

8.12 The TP Co-ordinator will be responsible for car-sharing if necessary, and will build a database of potential car-sharers after analysing shift patterns and methods of travel from staff surveys.

8.13 The TP Co-ordinator will manage and maintain the car sharing initiative. It is key to ensure that where a car is shared on arrival to work, and the driver has to then leave early (for emergency or unexpected reasons), those passengers must be offered a paid journey home by public transport or taxi.

9.0 COMMITTED MEASURES, FUNDING & DATES

9.1 The Developer shall be fully committed to undertaking and funding the following measures:

PROPOSED MEASURES	DATE	FUNDING AND COSTS	RESPONSIBILITY
Appoint a TP co-ordinator to undertake staff surveys and to liaise with HBC and other local transport groups	Approx 6 months prior to occupation	Approx £2,000 per Annum for a minimum of 3 years	The Developer
Issue the TP as a working document within six months of operation on-site	6 months after first occupation	Fees covered in Co-ordinator fees above	TP Co-ordinator (or in house co-ordinator)
Erect information on public transport in key locations within the site and distribute cycle / walking literature to staff and residents.	Prior to first occupation of site	£500	The Developer
Include information on public transport walking and cycling to staff. A Travel Plan pack to be agreed with HBC for both the residential and industrial aspects of the development site	As soon as staff start working at the site	Fees covered in Co-ordinator fees above	TP Co-ordinator (or in house co-ordinator)
Actively pursue a tax-free cycle purchase scheme.	As soon as staff start working at the site	None	The Developer
Provide cycle stands	As part of Construction	As part of Construction	The Developer
Provide cycle storage for residential units in the form of garden sheds	As part of construction	As part of construction	The Developer
Provide all residents with TP Welcome Pack, including information on sustainable travel and local public transport services	As soon as residents take occupation	Fees covered in Co-ordinator fees above	TP Co-ordinator (or in house co-ordinator)

10.0 MONITORING & REVIEWING

Monitoring

10.1 Monitoring progress towards targets of non-car travel will be an essential part of the TP. The TP Co-ordinator will be responsible for recording progress. Residents, staff and visitors will be surveyed as to their means of travel as part of the continuing target and to identify areas that can be improved. For this development it will be a case of maintaining the current sustainable transport choices made by staff members.

10.2 The Travel Plan review will be I-TRACE compliant and all surveys will be undertaken in accordance with the I-TRACE survey tool.

10.3 It will be necessary to agree with HBC a simple questionnaire / survey sheet, which can be used to record travel modes and numbers. Each resident and staff member will be expected to fill out this questionnaire. This should include at least:

- Travel mode of residents, staff and visitors;
- Demand for car parking;
- What problems do you have with public transport;
- What incentives would encourage you to travel in a more sustainable way;
- Where do you park (if driver)

10.4 An annual report with findings from the above surveys will be copied to HBC. This report will also make proposals for future measures towards achieving the targets as set out within the TP.

TP Review

10.5 It will be necessary to review the TP on a regular basis. The first review will be 6 months after first occupation and the second will be 18 months after first occupation.

10.6 Subsequent reviews will then be undertaken every two years until otherwise agreed with HBC.

10.7 Results from the travel surveys and monitoring process will be used in the TP Review in order that the strengths, weaknesses, opportunities and threats can be identified.

10.8 HBC will be shown copies of the review results and actions for the following TP so that an updated TP can be agreed.

10.9 The targets set out will be referred to at every stage of the review process, to ensure that the original objectives of this Travel Plan are met. If the targets are not being met, then the TP Coordinator will investigate the reasons why the occupants are not taking up some of the proposed measures and look at new ways of encouraging their take up.

11.0 SUMMARY

11.1 This report sets out a TP for the proposed mixed use development at Station Road / Furniss Way, Hayling Island, PO11 0EL. The main objectives of the TP are to:

- Provide information on and promote the use of public transport;
- Encourage the use of public transport travel by residents, staff and visitors;
- Reduce car usage;
- Promote car sharing;
- Promote walking;
- Promote cycling;
- A Travel Plan pack will be provided to all residents and staff of the development.

APPENDIX A

Proposed Site Plan

KEY

- Site Boundary
- Proposed New Homes
- Proposed Light Industry
- Proposed Pumping Station
- Existing Trees and Root Protection Areas (RPA)
- Proposed Landscaping
- Existing & Proposed Surface Water Drainage Ditches
- Proposed Dry Surface Water Attenuation Basin
- Proposed Vehicular Access
- Potential Future Pedestrian Access
- Potential Maintenance Access to Drainage Ditches

D	03/05/13	DP	Layout amended to include drainage strategy
C	16/02/13	DP	Layout amended to include larger house types
B	27/02/13	DP	Layout amended to include central courtyard
A	21/02/13	DP	Reduced open space & increased car provision

Revised Date: 03/05/13
