Emsworth – Nore Farm Stream Flood Alleviation Scheme

Planning Application

Tree Survey

Date: 30th March 2014

Version 3.0

Application to Havant Borough Council for the installation of a Flood Alleviation Scheme and wetland habitat to the North of A27 Emsworth.

Tree Survey:

A walkover survey was conducted on 7th March 2012 to carry out an initial appraisal of potential arboricultural impacts arising for the shortlist of scheme options.

The Flood Storage Area proposed within this application is to be sited on land which runs adjacent to strips of trees growing on highway embankments or within railway land. These are small, young trees that are unlikely to be affected by any excavations due to their age, size and position on a bank.

There are no Tree Preservation Orders (TPO's) in place within this site.
