19th May 2014

To support my application for you to increase the time that I am allowed to occupy my property I wish you to consider the following :-

The winter of 2013-2014 had some of the worst weather ever to be recorded with torrential rain, storms battering the coasts for weeks on end and gale force winds.

During this onslaught my property had no damage caused to it nor was this area affected by any flooding from either the continual rains nor by any sea water as the high water levels were contained by the recent works carried out to the seawall along the creek.

The ground clearance of my caravan is 21 inches from ground to the underside of the floor which is again to my advantage.

We were told that the weather we experienced was probably the worst on record so I am pleased to be able to tell you that my property and for that matter surrounding properties escaped unscathed.

Yours sincerely

Henry C
