

Explanation for proposed works

T1: Willow Tree

Customer has been advised by a tree consultant that the tree needs to be taken down (felled). However the customer likes the tree, wants to retain it and so would like the tree re-pollarded back to the old pruning cuts, to help keep it safe.

T2: Sweet Chestnut

In my professional opinion the tree needs to be reduced because of its close proximity to the house. It also impedes light into the property.

The customer likes the tree and only wants to keep it under control with a 2 metre crown reduction.

T3: Ash Tree

The Ash tree is a self-set tree. In my professional opinion the wrong tree for its position which may cause problems in the future. It is a young tree with no aesthetic or amenity value and it can be replaced with a more suitable specimen.
