Change of use from Office to School

For Hillcrest Care Ltd

September 2013

1.0 **INTRODUCTION**

- 1.1 The proposal is for change of use from office to use as a school.
- 1.2 The property is situated on the north side of Jubilee Road an unclassified road (U601 SZ) and as with the surrounding roads is subject to a 30 MPH speed limit. There is a system of street lighting and footways to both sides and on road cycle lane.
- 1.3 The road was at one time a through road with access to both London Road (A3 AG) to the east and Milton Road (U601 KA) to the west. It is closed to through traffic at the junction with Coronation Road (U601 SF). Vehicular access to the site is from Milton Road only.
- 1.4 In recent years Aston Road (U601 TJ) has also been closed to all but cyclists and pedestrians and has resulted in a reduction in the number of goods vehicles using Jubilee Road.
- 1.5 The eastern end of Jubilee Road and Coronation Road are residential. Aston Road serves industrial and employment uses and the western section of Jubilee Road is in mixed use and includes industrial, residential, a day centre and is one point of access to a recreation ground to the north.
- 1.6 The building, number 84-86, is currently vacant but was last in use as an office for Chubb, it has access direct to the public highway and has an overall floor area of some

553 Sq Metres over two floors. To the west is a small industrial unit of approximately 145 Sq Metres.

- 1.7 The industrial unit, number 88a, currently has access through the office car park, has a small area for parking but all vehicles apart from cars need to turn within the confines of the office car park. If fully occupied this would result in drivers of goods vehicles making a difficult reverse manoeuvre to or from Jubilee Road. Originally the industrial unit shared an access with the residential unit, number 88, to the west and front of the industrial unit.

- 1.8 As part of this application the intention is to re-instate this original route to give a straight means of access to the unit and to give the school the sole use of the existing access and the ability to maintain a secure site for children (as required by the licensing authority and OFSTED).

- 1.9 The office currently has an over provision of parking with 33 car parking spaces. From the location of some of the marked spaces it would appear that Chubb had an above average need for parking provision.

- 1.10 The industrial unit currently has some 7 spaces which is again above the parking standards. The residential unit has a garage and two spaces to the front of same meeting the requirements for a four bedroom dwelling and a substantial area to the side.

- 1.11 From Coronation Road westwards to 106 Jubilee Road there are double yellow lines (no waiting at any time) restrictions to "on street" parking. From number 106 to

Milton Road there is no restriction. The level of parking has been observed at various times and the level of “on street” parking has varied from 7 to 15 vehicles. At all times traffic was able to flow with no queuing to enter from Milton Road,

- 1.12 The proposed school will operate following the Hampshire academic year. Start and finish time is proposed to be 0930 hrs to 1600 hrs Monday to Friday thus avoiding the normal peak traffic flows.

2.0 **CAR PARKING PROVISION**

- 2.1 Provision is to be made for 15 cars plus 2 disabled spaces with an overflow area to provide 5 overflow spaces should there be an additional occasional demand. In addition a secure cycle store is to be provided.
- 2.2 The document “Hampshire Parking Strategy & Standards 2002” looked for a maximum provision of 1.5 spaces per classroom however this was found to result in shortages and problems with overflow parking. Hampshire County Council has now produced “On Site School Parking Guidelines April 2013” This gives figures of 1 space per teaching staff and 2 spaces per 3 non-teaching staff plus a requirement for cycle storage and disabled car parking.
- 2.3 The school will be registering for 22 pupils with ages ranging from 10-18 years of age (although it is anticipated that there will only be 12 pupils at first) with 4-5 pupils per class.
- 2.4 Staffing will be:

4-5 Teachers, 4 Teaching Assistants, 2 Care Staff and 3 visiting Specialist/Instructors. In addition there will be occasional visitors – Social Workers, School Inspectors etc.

Parking requirements:

Teachers 5 spaces

Support Staff 4 spaces

Visiting Instructors 3 spaces

Occasional Visitors 3 spaces

Total school requirement 15 spaces

2.5 It should be noted that the pupils are in the care of Hillcrest Care Ltd and brought by car from the homes in which they live. These currently number three houses with the company actively seeking a further suitable house. These units are small family sized units the staff “live in” and will travel in to school with the pupils. The vehicles will be large family cars and apart from when educational visits are made will remain “on site”.

2.6 Support staff and ancillary staff such as cleaners are more likely to live close by and will be encouraged to use alternative means of travel such as public transport, cycling and walking.

2.7 The provision for the industrial unit will be maintained at 7 spaces. The standards would normally require only a little over 3 spaces (3.22). Having seen the unit with the

occupier it is felt that this lower level of parking would not be appropriate.

- 2.8 The current level of car parking, garage plus two spaces, will be maintained for the residential unit.

3.0 **ACCESS**

3.1 Proposed School: No new access to the public highway is to be constructed. For the school the only alteration to the access will be the removal of the bollards and chain and these will be replaced by gates set some 6 Metres back from the kerb line of Jubilee Road and designed to open into the site only.

3.2 Visibility at this access exceeds the minimum requirement for a 30 MPH road, under Manual for Streets, of 2.4 Metres by 43 Metres.

3.3 Turning facilities will be maintained for cars, emergency vehicles and light goods vehicles.

3.4 The existing surface water system has not been maintained for some time this will be overhauled and maintained to ensure surface water does not discharge from the site onto the public highway.

3.5 Industrial and Residential Units: No new access to the public highway is proposed. A section of timber fencing will be removed to allow access from the existing western access.

3.6 A minimum access width of 4.8 Metres will be provided and maintained to allow access for goods vehicles to reverse into the site and up to the industrial unit in a straight line.

3.7 Manoeuvring for cars and light goods vehicles will be retained “off road” to the current levels.

- 3.8 No gates to the western access are proposed under this application.

4.0 **ACCESS TO THE WIDER HIGHWAY NETWORK**

- 4.1 For vehicles this is via Jubilee Road to Milton Road the junction of which has in excess of the minimum visibility requirements.
- 4.2 For cyclists there is an “on road” cycle route the full length of Jubilee Road connecting with “on and off road” cycle routes on London Road and Milton Road and via Aston Road for those who wish to travel southwards.
- 4.3 For those wishing to use public transport there are routes north and south on both London Road, 475 Metres, (routes 37, 8 and X8) and Milton Road, 330 Metres, (routes 39, 7, X9 and 145). These routes connect with the “Hub” in Waterlooville, 1050 Metres, for destinations further afield. (see Appendix A). For rail travel the nearest stations are Cosham and Havant.
- 4.4 For pedestrians there is a good network of footways available into the centre of Waterlooville (1100 Metres) and the various residential estates around the area (Cowplain 1700 Metres, Wecock 1800 Metres and Lovedean 2300 Metres).
- 4.5 At 553 Sq Metres the school falls well below the threshold of 2500 Sq Metres, for educational establishments, given in “Hampshire Parking Strategy & Standards 2002” for Transport Assessment and Site Travel Plans. That said the use of alternative means of transport will be promoted

where applicable by the Head or designated member of the support staff.

- 4.6 The school day will be 0930 hrs to 1600 hrs Monday to Friday as stated in paragraph 1.12 above. This will avoid the peak traffic flows especially at the roundabout where Milton Road and Hambledon Road meet.

5.0 **TRAFFIC GENERATION**

- 5.1 TRICS is a large database of transport survey information that allows flexibility and a wide range of trip generation filtering criteria. It is however difficult to find comparisons for all sites and a close match gave a trip rate of 28.257 per 100 Sq Metres. This gives a daily figure of 156.26. I have also used the figure Hampshire County Council use to calculating transport contributions. This figure, 18.7 multi-modal trips per 100 Sq Metres of gross floor area gives a daily trip total of 103.411.

- 5.2 The proposed use as a school is again difficult to find a good match in TRICS due to the small scale nature of the proposal. The best match being a larger school with similar staff/pupil ratio gives a figure of 2.375 trips per pupil giving a daily trip rate of 52.25 trips.

- 5.3 In comparing the difference between uses one must take into account the length of the school year and that of a commercial business year which would normally only be closed at the weekend and on public holidays.

School year 195 days @ 52.25 trips = 10,188.75 trips
Commercial 252 days @ 103.411 trips = 26,059.57 trips
Commercial 252 days @ 156.26 trips = 39,377.52 trips

- 5.4 As can be seen use as a school results in a minimum daily trip reduction of over 50% and for the occupiers of the residential units an additional 57 days a year when the site generates no movements.

6.0 **TRANSPORT CONTRIBUTIONS**

- 6.1 Transport contributions are required in line with Hampshire County Council's Transport Contributions Policy dated September 2007. The sum is calculated on the additional multi-modal trips that the development will generate.
- 6.2 There are currently two rates payable, that for residential development at the rate of £535 pounds per trip and that for other development £230 per trip is currently payable.
- 6.3 There are five Policy Tests which planning obligations must meet. These are that the obligation must be :
- a) Relevant to planning;
 - b) Necessary to make the proposed development acceptable in planning terms;
 - c) Directly related to the proposed development;
 - d) Fairly and reasonably related in scale and kind to the proposed development;
 - e) Reasonable in all other respects.

6.4 Paragraph 6.3 of the policy states that “Where a site has a previous use, the net increase in multi-modal trips will be used to calculate the contribution. Where a site has been dormant for 5 years or more all traffic generated by a proposed use will be considered to be new to the network. This means that all multi-modal trips generated by the new development will be used to calculate the contribution.

6.5 I understand the building was occupied until September/October last year (2012) and therefore the 5 year rule does not apply. As demonstrated above the number of multi-modal trips generated by the site would decrease if planning consent is granted and as a result no contribution would be due.

7.0 **CONCLUSION**

7.1 The proposed change of use would result in a 50% reduction in the number of multi-modal trips generated by the site on any given day and well in excess of this if taken annually.

7.2 The hours of opening of the proposed school are set to reduce further the pressures on the local highway network at peak times.

7.3 The location has good public transport links, cycle routes and footways and therefore reduces the dependency of employees on the motor car for transport.

7.4 In highway terms there is no demonstrable harm with the change of use from an office to educational establishment.

- 7.5 With the children to be educated also being accommodated by Hillcrest Care Ltd and transported by the staff there is no drop off/pick up by numerous vehicles over a protracted period at both ends of the school day.
