Dear David,

Thank you for this email prompt.

I have had a chance to look at the proposals and I am pleased to note that our earlier concerns regarding privacy have been addressed with the introduction of a closer mesh in the panel at eye level around the critical sections. Although this will not entirely eliminate the ability to overlook the garden, the intention to provide CCTV coverage within the bridge should discourage anyone from committing such nuisance.

Thank you for taking up our concerns in the pre-application discussions that took place. Hopefully prospective purchasers will be able to gain a clear picture of the future surroundings.

Kind regards,

Ron
