

Portsmouth GC LVIA photos - 24.05.13

Photomontages/panoramas for LVIA

The photographs overleaf were taken on 20/5/13 at 14:30hrs. If printed at 100% so that they are 140mm high they can be viewed at 300mm from the eye to give a true representation of the design proposals. The proposed ball-stop fencing is 5m high and the planting is shown at year 15 with the trees nearer the practice area tee being of a smaller variety – proposed tree planting shown between 5m and 7.5m high. The photomontages show all the proposed earthworks and tree removal on site.

View #1 – showing view looking south across College Road to existing practice area outfield at western end

View #2 – showing view looking south across College Road to existing practice area outfield with superimposed 5 metre, ball-stop fencing

View #3 – showing view looking south across College Road to existing practice area outfield with native planting at 15 years

View #4 – showing view looking south across College Road to existing practice area outfield (near proposed new 8th tee at eastern end)

View #5 – showing view looking south across College Road to existing practice area outfield with superimposed 5 metre, ball-stop fencing

View #6 – showing view looking south across College Road to existing practice area outfield with native planting at 15 years, with gaps to retain views through
