Dear Mr Eaves

Thanks for the pdf file. We would select the "retain existing floor levels" option, however we cannot manage to send the form back to you. Would it be possible to use our our intended provisions listed below to you and for you to select that option on the form there?

Yours

Mark Greeman

Flood resilience measures.

**In addition to not lowering the existing floor levels I intend to:
raise the level of all new electric sockets on the ground floor,
we do not intend to add any further impermeable paving beyond what is
already there.**
