RE: Capacity check application for Phase 2, Denvilles, Off Blenheim Gardens, Havant, Hampshire, PO2 9PN

Dear Mr. Thrussell

We have completed the capacity check for the above development site and the results are as follows:-

Foul capacity check:

There is currently adequate capacity within the local foul sewerage network to accommodate a flow of 4.6 l/s at manhole reference 1001.

Before any connections are made, an application form needs to be completed and approved by Southern Water Services.

Surface water capacity check:

As surface water capacity check has not been requested it is assumed that surface water will be disposed off by alternative means such as soakaways or any local drainage watercourses, subject to all interested parties approval.

Should you require any further information, please contact us at the above mentioned phone number or address.

Yours faithfully,

Network Development

Please note: -

The information provided above does not grant approval for any designs/drawings submitted for the capacity analysis. The results quoted above are only valid for 12 months from the date of issue of this letter.

SOUTHERN WATER

The positions of pipes shown on this plan are believed to be correct, but Southern Water Services Ltd accept no responsibility in the event of inaccuracy. The actual positions should be determined on site.
