

HERITAGE STATEMENT

26 HIGH STREET, EMSWORTH

This 2 storey building is a shop (and former house) built in the mid 18th Century. It has stucco coated walls and a tile roof with parapet to front of the building and there is a wooden, moulded band around the shopfront which holds the signage. The windows are Victorian sash and the shopfront dates from the early 20th Century.

The proposed new signage will enhance the appearance of the building. Modern and fresh but retains the appeal of the property as an 18th Century building in use as a 21st Century shop. It also fits in well with its immediate vicinity and as part of the Emsworth Conservation Area. Materials for the signage are lightweight and strong. Screw holes will be reused wherever possible and there will be minimum impact on the moulded band. The vinyl window cling will have a smaller impact visually and no impact materially.
