Subject: RE: 104149 Branch 149 Lloyds Pharmacy Unit 2, Central Buildings, West Street, Emsworth

Hi Jenna,

Whilst the illumination proposed is more subtle than expected the amount of illumination still concerns me. I would therefore still wish for the amount of illumination to be reduced to the levels previously outlined. Emsworth as a conservation area does not have a vast array of premises with illumined signage and whilst illumination would normally be resisted I understand that as a public service the pharmacy would need some. The entrance is fortunately located in a prominent location and therefore I consider illumination over this area coupled with the projecting signs would adequately promote the service whilst not causing harm to the conservation area.

Many Thanks

Pete
