Richard

The supporting arboricultural evidence is comprehensive and outlined in the following points:

Most of the trees proposed for removal are all of low value and grading and could have been removed for sound arboricultural reasons regardless of any redevelopment proposals.

However there are three Cat B trees/groups (T15, G19 and G20) outlined for removal that I can not support

I would wish to review the Landscape Master Plan so as to ensure that high levels of shrub and tree planting as well as other landscape features will be added to enhance this site, so as to adequately mitigate the loss of any current trees from this site.

Provided that the methodology prescribed in the AMS & TPP report is strictly adhered to and a pre commencement / site monitoring exercise is undertaken I would expect the retained trees to survive the development unscathed and to continue to grow on in the future.
