Daph

I agree with Bernie and his email highlights my initial concerns when we discussed this case/release of conditions - in that the MS does not afford the tree full protection.

The applicants Arb was copied into Bernie's reply and as such we can await a response.

Thanks
Jamie

Jamie,

Many thanks for forwarding the Method Statement for my review and comment.

Whilst I find the document to be well set out and easy to follow it does not quite accord with my recollection of what we agreed out on site in that :-

1. Dimensions referred to out on site are not shown on the Tree Protection Plan – I feel this is essential for my clients security and indeed the full protection of the tree.
2. I understood that all of the ground between the foundation dig and the boundary fence was to receive Ground Protection – either the final 'No Dig' porous surfacing detail or temporary ground protection that would be replaced with the final porous surfacing detail – this MS therefore only goes so far and whilst it is fine for the construction phase we will now need to see an addendum Method Statement to cover the treatment of the ground between the building line and the fence otherwise there is no commitment in this respect and they could in theory dig it up and damage roots and you would not have anything to hold them too or enforce!!

Regards,

Bernie Harverson

Hi Bernie

Please find attached the new AMS submitted by Barrie for the discharge of conditions. (Received today)

I'm on leave now until Nov 5th so any comments you may have I will respond to on my return.

Thanks
Jamie

Dear Daphney,

I understand from your phone call to my colleague that Appendix 1 was missing from the previous submission. This had been included within the Arborist report and we attach this for clarity.

Please let me know if you need any further information,

regards
