

24/03/11

11/00150 CA

23 Brookside Road, Bedhampton, Havant.

Proposal

Cut back to old pollard points 1 no Sycamore T1, and group of Conifers T2, and crown reduce by 25% 1 Pear tree T3.

Comments.

The trees in question stand in the eastern garden area of the property.

The Sycamore, T1, is a small mature specimen located in the northeastern rear garden. The Sycamore appears to have been previously pruned, and the proposals to crown reduce the Sycamore to manage its canopy size appear to be reasonable at this time.

The Conifers, T2, are a Cypress hedge located on the northeastern boundary of the rear garden. The Cypress hedge has been previously pruned and reduced, to keep it as an informal hedge feature. The proposed works appear to be reasonable at this time.

The Pear tree, T3, is a small mature specimen located centrally in the eastern rear garden. The proposals to prune and maintain the Pear tree appear to be reasonable at this time.

A tree preservation order is not required in this instance.

No Objection

23 Brookside Road, Bedhampton, Havant.

The Sycamore, T1, is a small mature specimen located in the northeastern rear garden. The Sycamore appears to have been previously pruned, and the proposals to crown reduce the Sycamore to manage its canopy size appear to be reasonable at this time.

The Conifers, T2, are a Cypress hedge located on the northeastern boundary of the rear garden. The Cypress hedge has been previously pruned and reduced, to keep it as an informal hedge feature. The proposed works appear to be reasonable at this time.
