

# SUPERSEDED

A gradual lighting scheme will be implemented going from standard highway lighting in the main residential area to directional lighting on the perimeter of the site and low directional lighting on the edge with the public open space

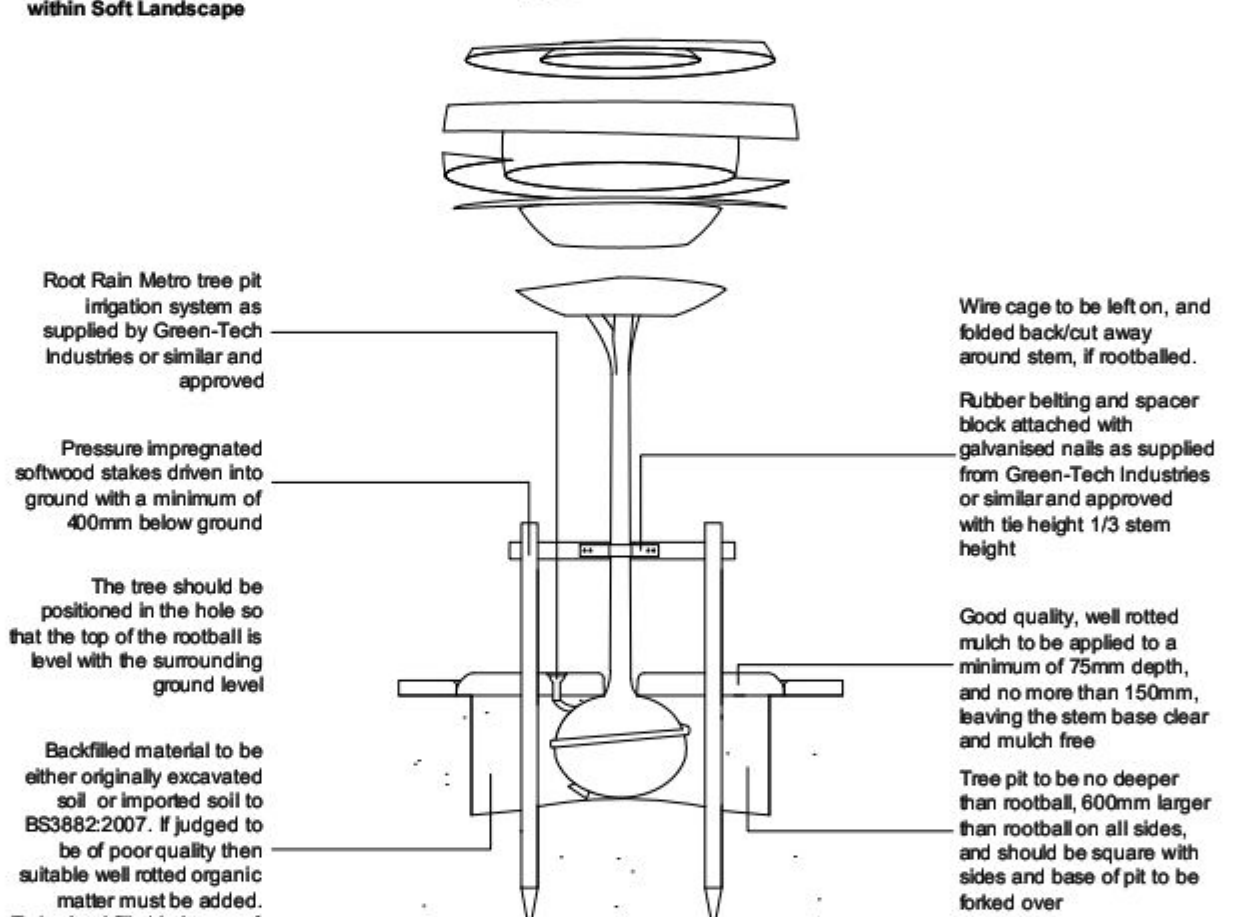

**SPECIFICATION**  
Forestry Commission Practice note 8.  
All native species should be of local stock. Native trees and shrubs certified as British Native plant stock.  
All planting should comply with the Horticultural Trade Association National Plant specification.  
All planting preparation, handling, planting & maintenance should be in accordance with CPSE Code for Handling and Establishing plants.  
All trees and shrubs to comply with BS 4043:1989 and BS 4283:1989.  
All works generally, to comply with the written Soft Landscape Specification.  
Topsoil incorporated into planting beds to be gently mounded towards the centre of each bed to allow for settlement.  
On completion of planting the whole area of the shrub bed shall be mulched with 75mm consolidated thickness of medium textured decorative grade natural pine bark having first been prepared in accordance with the specification.  
Free standing hedges shall have a 3 strand galvanised wire and tanalised softwood timber post fence, to BS 1722-2:2000, erected along a line between the two rows of hedge plants.  
All existing trees and hedges to be protected in accordance with BS837:2012 for the duration of the construction period.

NOTE: DO NOT SCALE FROM DRAWING

## Legend

- Existing trees to be retained and protected during construction
- Proposed tree planting within soft landscape, see details
- Proposed specimen shrub planting to receive short angular staking on half standards with expendable tree ties. Irrigation tubing to root system of Amelanchier specimens as required
- Proposed climbing plants to be trained up adjacent wall/fence/peg with galvanised wires and hook set 250mm apart with support canes removed prior to planting
- Proposed shrub planting to receive 75mm bark mulch after planting operations. Mounds to be planted in groups of 5-7m, of each species
- Proposed ornamental hedge planting to be planted in a double staggered row 500mm apart and at 500mm centres in each row. To be maintained at 1.2m height and 1.8m adjacent to plot boundaries
- Proposed ornamental roadside hedge planting to be planted in a double staggered row 500mm apart and at 500mm centres in each row. To be maintained at 1m height. Planted in parallel rows with the Escallonia row planted closest to paths.
- Proposed grass areas to receive good quality amenity grass sown in line with good horticultural practices
- Proposed grassland areas to be seeded with good quality grass seed mix with 20% locally sourced wildflower mix
- Cut lines

## Tree Planting Pit Detail within Soft Landscape

All components as supplied from Green Leaf or similar and approved

## Planting Schedule dwg. 15
