

Vegetation to be retained:

Existing trees to be retained

Existing off-site unclipped hedge to be retained (including hazel, beech, hawthorn)

Existing off-site shrubs to be retained

Existing on and off-site shrub belt to be retained (including elder, sycamore, hawthorn). Will be part of the reptile translocation site.

Vegetation to be removed with reason:

Existing hawthorn, sycamore and large tree stump to be removed.

Reason: Poor quality and condition and within parking area of plot 7

Existing self-seeded, multi-stem sycamore to be removed

Reason: Too close to pines which are to be retained, and sycamore are unsuitable for location within rear garden of plot 7, due to their eventual size and propensity to self seed

Proposed new trees to boundary (see plan):

2 new trees proposed (1 holly, 1 hawthorn)

3 new trees proposed (birch) to screen above new close board fence.

1 new tree proposed (hawthorn) to screen above new close board fence.

1 new tree proposed (hawthorn) to screen above new close board fence.

Note: New 1.8m high close board fence proposed to site boundary - 2m high adjacent to reptile translocation area.

Refer to Terra Firma plans 1487-1001 and 1487-1002 for locations on plan.

Scratchface Lane, Bedhampton
Existing vegetation to eastern boundary

date: 16 September 2013
