The application form states that there are two existing spaces and two proposed spaces. I aassume that does not include parking in the existing garage. The design and access statement states that each property has one parking space plus a space in the garage however the plans do not show these spaces and more importantly how the vehicles can turn on site to exit in a forward gear. Also from the plans it is difficult to see how a vehicular can reverse out of the garage I need to know the distance between the front of the proposed garage and the boundary opposite
