

Construction and Demolition Waste

Waster Management Plan for the construction of a pair of semi-detached dwelling on land at 5 Victoria Road, Emsworth.

This application is for the construction of a pair of semi-detached house on previously developed land

The materials, which will form the demolition waste will be; the old floor slab from the previous dwelling on the site.

The site will also be cleared of vegetation and a small amount of soil may be removed, this depends on the final levels of the garden area, the site is currently so overgrown that the site surveyors were unable to complete the level survey further into the site. Some topsoil from the excavations may be used to level the garden area; a licenced carrier will remove all other spoil from site.

All material removed from the site will be taken from site by a licensed carrier.

July 2013.
