5. What Are You Applying For?

Are you seeking consent for works to tree(s) subject to a TPO? ☒ Yes ☐ No

Are you wishing to carry out works to tree(s) in a conservation area? ☐ Yes ☐ No

6. Tree Preservation Order Details

If you know which TPO protects the tree(s), enter its title or number below.

1656

7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below: tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

Ref. TPO 1656, Dawn Redwood. Fell the tree because of excessive shading, making one side of the house dark throughout the period the tree is in leaf. In the autumn, the tree loses its needles shedding them over the parking area and house entrance. The needles are very difficult to sweep-up, particularly when the ground is damp. However they will stick to shoes where they are walked into the house and into vehicles. As the tree is so close to the main entrance, there is a constant

7. Identification Of Tree(s) And Description Of Works continued ...

- battle to prevent needles being walked into the house.
Furthermore, the gutters & downpipes must be cleared regularly to prevent blockage.
- When in leaf, the tree cannot be seen from the road, it is completely obscured by neighbouring trees. We the residents are the only ones that can see the tree, but none of us appreciate it as it is much too close to the house.
- In the rear garden, we have planted a Cedrus Deodara, an evergreen weeping conifer which may grow up to 30m tall.
- Some 14 years ago, the main drain at the front of the house that runs down the access driveway blocked. A specialist drain repair company was called in and following excavation found the Dawn Redwood TPO 1656 roots had penetrated and displaced the drainage system. We fear the same root damage may occur again.

8. Trees - Additional Information

Additional information may be attached to electronic communications or provided separately in paper format.

For all trees

A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.
