

St Faith's Church House, The Pallant, Havant

Tree Survey / Arboricultural Statement

This is a single yew tree standing in the courtyard outside the St Faith's Charity Shop in Coach House. The needle drop blocks drains and gullies and results in water penetration and damage to the building, which is Grade II listed. In addition, birds, mainly pigeons, roost in the branches and their droppings create a severe hazard to users of the charity shop. Ideally we would like to severely cut back the branches that overhang the shop entrance. If you are unable to provide permission for this, then any other ideas you have would be greatly appreciated.
