

7 London Road, Purbrook

Landscaping Details

The existing property has a sizable side garden surrounded by hedges. There is a sheltered area with a few trees. The main play area is covered in soft material with some low bushes next to the building. Whilst the trees and hedges on the property and in the churchyard and car park do contribute positively to the conservation area and the setting of the listed buildings, they are not affected by the development. No changes to the landscaping are proposed.
