Dear Mr Nash,

Planning consultation: Demolition of existing 2 bed detached bungalow. Construction of replacement 2 bed bungalow and external decking area to rear.
Location: 28 The Kench, Ferry Road, Hayling Island, PO11 0DF.

Thank you for your consultation on the above dated 08 March 2013.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

The application site is in close proximity to the Langstone Harbour Site of Special Scientific Interest (SSSI). This SSSI is part of the Chichester & Langstone Harbours Special Protection Area (SPA)/Ramsar and the Solent Maritime Special Area of Conservation (SAC).

Natura 2000 site – No Objection Subject to Conditions

Natural England advises your authority that the proposal is not likely to have a significant effect on the interest features for which the above SSSI/SAC/SPA/Ramsar sites are designated, either alone or in combination with other plans or projects. Furthermore, we would wish to see conditions and advice to the effect of the following attached to any permission granted:¹

- Given the bird sensitivities in the area, the proposed construction will need to be timed and undertaken in a suitable way to minimise disturbance to over wintering and nesting birds, therefore it will be necessary to:
 - Ensure best practice is in place for operating machinery to reduce unnecessary noise;
 - No percussive piling or works with heavy machinery (i.e. plant resulting in a noise level in excess of 69dbA_{max} – measured at the sensitive receptor) to be undertaken during the bird overwintering period (i.e. October to March inclusive), unless the existing noise level measured from the sensitive receptor already exceeds 69dbA_{max}; in which case, no such works shall be undertaken during the specified period if the resulting noise level would exceed the existing noise level measured from the sensitive receptor.

Note: The sensitive receptor is the nearest point of the SPA or any SPA supporting habitat (e.g. high tide roosting site). In this instance, the Chichester & Langstone Harbours SPA which is adjacent to the site and could be impacted by this proposal.

- In accordance with Environment Agency guidelines, all reasonable precautions shall be undertaken to ensure that no pollutants enter the water-course.

¹ This reply comprises our statutory consultation response under provisions of Article 20 of the Town and Country Planning (Development Management Procedure) (England) Order 2010 Regulation 61 (3) of the *The Conservation of Habitats and Species (Amendment) Regulations 2012* and Section 28(1) of the *Wildlife and Countryside Act 1981* (as amended).

- All materials, equipment and machinery shall be stored in a designated compound, within the curtilage of the property and outside the SSSI.
- The applicant shall carry out operations in such a way as to give rise to as little damage as reasonably practical to the SSSI. This includes restricting vehicles movements within the SSSI/SPA/Ramsar/SAC to a minimum.
- All contractors working on site shall be made aware of the designation afforded Chichester & Langstone Harbours as a SSSI and be provided with a map that clearly shows its defined boundary in relation to the development site.

SSSI

Natural England is satisfied that, subject to the imposition of the above conditions and the development being undertaken in strict accordance with the submitted proposals and the conditions set out above, these development proposals will avoid impacts upon the interest features of the Chichester & Langstone Harbours SSSI.

These conditions are required to ensure that the development, as submitted, will not impact upon the features of special interest for which the Chichester & Langstone Harbours SSSI is notified.

If your Authority is minded to grant consent for this application without the conditions recommended above, we refer you to Section 28I (6) of the *Wildlife and Countryside Act 1981* (as amended), specifically the duty placed upon your authority, requiring that your Authority;

- Provide notice to Natural England of the permission, and of its terms, the notice to include a statement of how (if at all) your authority has taken account of Natural England's advice; and
- Shall not grant a permission which would allow the operations to start before the end of a period of 21 days beginning with the date of that notice.

Other advice

Natural England does not hold locally specific information relating to local sites, local landscape character and local or national biodiversity priority habitats and species. These remain material considerations in the determination of this planning application and we recommend that you seek further information from the appropriate bodies (which may include the local records centre, your local wildlife trust or other recording society and a local landscape characterisation document) in order to ensure that your authority affords these matter the appropriate weight in determining this application. A more comprehensive list can be found at [Wildlife and Countryside link](#).

We would be happy to comment further should the need arise but if in the meantime you have any queries, please do not hesitate to contact the case officer Rebecca Bishop on 0300 060 0958. For any new consultations or issues, please contact consultations@naturalengland.org.uk.

Yours sincerely,

Rebecca Bishop
