Richard

The proposed site plan shows a green landscape strip around three sides of the plot, some areas with shrub symbols superimposed and some without. The shrub areas are agreed, but if the plain green areas are supposed to represent proposed grass then these are not approved, because they are too narrow and they would be difficult to mow, therefore shrub planting would be preferable. The green strip next to the proposed parking spaces on St Georges Walk should be paved rather than planted because it would be trampled by people getting out of their cars, however it may be possible to include a small tree on this frontage.
