Daph

The minor changes do not have any additional impact to the trees on site and provided that the methodology prescribed in the AMS & TPP report is strictly adhered to and the site monitoring exercise is undertaken I would expect the retained trees to survive the development unscathed and to continue to grow on in the future.

Therefore I have no objections to this scheme in arboricultural terms.

Hi

Jamie

this relates to relatively small changes to the approved layout and as far as I can see the relationship with trees is unchanged, however there is an Arb report - see attached so could you take a look to see if you have any concerns.
