Subject: 35a Sandy point road

Dear Mrs Lealan.

My name is Justin Orriss and i live at No.37 Sandy point road, you spoke to my partner Anita back in 2011 in connection with the previous planning request from 35a sandy point road which gave us both a few sleepless nights, your manner and professionalism were very much appreciated and although very late its this objection that i hope you will have chance read and again take into account our feelings about the proposed works next door.

Although i have no cause to complain about the proposed plans for the conversion at the property its the overall height of the new roof/ ridge line which was a concern last time and its still a concern this time. On paper it seems very fair to move the doormers to face west so as to not overlook our property and we are very grateful for that, but its going to be the overall impact when the new roof goes on and judging by the plans on the councils website its over a third higher than the existing roof line , this i feel is unacceptable and as last time i dont feel is fair because 35a with the new roof will be a much more imposing building especially as it runs almost the entire length of my property and garden.

Once again i apologise for taking so long but i have studied the plans and although i wish no malice i feel i simply must object.

yours sincerely

Justin Orriss
