

Property: 134 London Road, Waterlooville, Hampshire PO7 5SU

TPO No. 1899 - T2

Tree Species: **Beech Tree**

Reason for work:

Main stem has grown into four main parts creating a danger of splitting in high winds. If the tree falls it is large enough to fall on to either our own property or the new property built at 136 London Road. There is also a danger of falling branches due to "rubbing" where branches overlap. The tree covers approximately 50% of our rear garden.

We propose that the crown is reduced by as much as possible to reduce weight, height and shading. The crossover limbs will also need to be removed because some have already fallen.

See attached photographs and sketch plan.
