

GARAGE

CH-1

This is a short report accompanying and supporting my application for change of use and building a garage. My family have lived in this house for over forty years, much of that time as council tenants. Six years ago we were able to buy the property , but not the small area of land that will face my garage door "when built", the council were not willing to sell at this time. It has been a constant nuisance and eye sore to for years. People park their cars there and constantly knock down our garden wall. We also have a problem with rubbish being dumped, and as I have already said a constant eye sore for my family and neighbours . We have recently been able to buy this land so would like to make a big improvement to the area buy building a garage and enclosing this corner off, in so doing leaving a very pleasant out look for our neighbours and useful garage for ourselves .
