29<sup>th</sup> April 2011

Dear Rachael

Re: Planning application – 95 Silvester Road – APP/11/00270

Further to your email communication dated 28<sup>th</sup> April I can confirm that as recommended we are submitting a revised plan and photos (attached) to show that all existing trellis fencing will be replaced with solid fencing to a maximum height 2.5m as requested to the front building line of the dwelling adjacent to 97 Silvester Road.

You also mentioned this works would need to be carried out within a 2 month timescale and I can confirm this will be completed well within the allocated timeline. We accept that it is a condition that the fence remains at this height unless further permission is sought.

I trust this is everything you need to progress with our application, if however there is anything else you need please ring me on my mobile 07515 884970 or email me at g.blackman@sky.com to keep any delays to a minimum.

I look forward to hearing from you.

Gail Blackman
