Description

This 20' x 10' Windowless Value Overlap Workshop is one of the largest wooden buildings available in this range. This building has been designed with security in mind so it features no windows. Without windows your belongings are out of sight and away from prying eyes. This building has a traditional apex roof and is clad with 8mm overlap timber boards. Overlap cladding has a rustic appearance and protects this shed from weather conditions like wind and rain. The floor of this shed is made from 10mm solid sheet board, this provides a sturdy base so you can store items or store machinery. The high eaves height of this building also makes it perfect for storing tall items like sporting equipment. The double doors on this building provide a large entrance so you can easily store and retrieve large or awkward items. The doors of this building are braced for extra security and come pre-fitted with a pad bolt so you can secure your belongings when the building is not in use. If you're looking for a affordable, large shed with extra security features, this shed is perfect.

Please note In order to receive the full 10 year anti-rot guarantee, it is necessary that you treat the garden building with a high quality preservative shortly after construction. Please see After Sales FAQ's for further information.

Delivery is **FREE** to most UK postcodes. Please check the [Delivery Section](#) for further details.
