EXPANDED METAL EXTCELL SYSTEM

The Extell expanded metal fencing system is a traditional form of perimeter protection. The panels are formed from sheet metal, without welds, making them highly durable. The posts are made from heavy duty steel sections and in conjunction with steel horizontal stringers a strong and rigid framework is accomplished.

Specification

- Panels are 3100mm wide and available in heights of 1.8m, 2.1m and 2.4m
- Two gauge thickness are available: Medium and Heavy.
- Stringers, post clamps and assembly fixings are also supplied.
