17th November 2010

Havant Borough Council
Planning Department
Civic Offices
Havant
Hampshire

Dear Sirs,

RE: Regularisation of External Works - 70, Bedhampton Hill – Havant.
Planning Application Ref. 1290920

Further to your letter dated 4th November from Mrs. Ware, I now enclose the application fee in respect of the electronic application submitted 17/11/2010

The application is to regularise 'engineering' works as built in the rear garden to form terraces on the sloping site, along with alterations to the southern boundary brick entrance piers.

In addition, there are further works to the southern boundary which have not yet commenced, namely, rebuilding the remaining piers and walls to be 4 brick courses higher than existing.

There is also shown on the drawing a translucent flat roof over the existing fish pool which is to be supported on timber columns, which I understand is permitted development.

The replacement brick wall to the western boundary, and replacement close boarded panelling ditto is also permitted development..

I look forward to hearing from you in due course.

[redacted]
