

Planning Statement

We would like a sign on the post opposite the campsite to direct the public to the campsite.

The location is directly opposite the campsite and wouldn't impose on the landscape as there is a bus stop and a lamppost already there.

The sign that could go on the lamp post that is already in suite.

Would be an arrow shape stating The Oven Campsite, with blue writing.

Visibility of the sign will not be intrusive to the landscape.

The sign will comply with planning regulations and policies.

We will ensure the sign meets all relevant regulations regarding safety, lighting, and materials.

Sustainability and energy efficiency materials to be used

The sign will be maintained and cleaned regular and when needs replacing will be replaced.

There will no need to have a power supply to the sign.

Key benefits of the sign are to direct the [public to the campsite, without the need of driving past and then going down to the roundabout and coming back up. The sign will minimise the traffic on manor road and reduce pollution from traffic doing unnecessary journeys.

Kind regards

The Oven Campsite
