

Existing Site Details

The existing dirt jump facility located at the site consist of compacted dirt tracks, compacted dirt jumps, a compacted start mound and vegetation. Jumps range from 30cm in height from the ground to 1800cm + at the start mound.

There is no formal track layout plan due a historic agreement between Havant Borough Council and a Community User Group, this agreement allowed users to alter the site as they saw fit. Meaning that the layout could, and did, change.

Below are images taken from the site.

Start Mound

Compacted mud/dirt surface, 1800cm + from ground level.

Jumps and Tracks

Various sizes in height ranging from 30cm – 1200cm. Made up of compacted mud/dirt, with surrounding grass.

General Track Layout

Photo taken from the top of the start mound.
