

## **Heritage Statement**

**For**

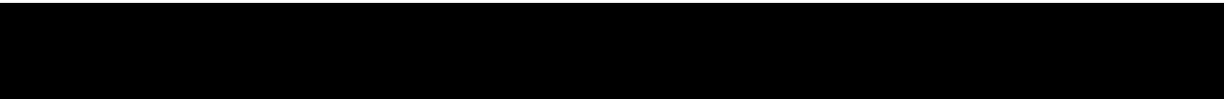

### **Rear Single Storey Extension and Dormers to the rear at 7 Western Road Havant PO9 1NJ**

The existing property has been used as a single family terraced dwelling with an existing loft conversion.

The proposed materials will match as closely as possible to the existing.

The proposal is to replace an existing loft conversion, which is in a bad state of repair with a flat roof L shaped dormer and a small side extension.

Unfortunately I was not aware that the property was a conservation street, which I have never heard off before, I am aware of conservation areas.

Overall we would suggest that if the consent is granted for the proposed change then it would only serve to enhance the building within the conservation street.

I would also like to know why and what makes the Road a conservation Road?.
