
RE: Planning Application APP/25/00489 66 Southleigh Road, Havant, PO9 2QJ

[REDACTED]

I can confirm that the TPO Walnut was at the end of its Safe Useful Life Expectancy (SULE) due to the identification of a pathogenic fungus present.

This resulted in an application to fell the tree and re plant with a new tree, the proposed development is not subject to any tree constraints, and I raise no arb objections to the application.

Best wishes

Jamie Gargett MICFor
