

FOA - The planning officer Mr David Eaves

Objection to the proposed developments:Ref: APP/24/00245 &Ref: APP/24/00232

Emsworth House Close is mainly occupied by older people who frequently rely on carers and the emergency services. Any proposed development will put us at risk, due to access and parking, during and after construction.

The street is narrow and often full of cars making access for emergency services difficult, if the road is further congested due to building and deliveries this will cause even more disruption.

Has anyone considered that the safety of older people whose mobility is limited and the risk they will be put at during the construction phase?

I therefore would like to strongly object to both applications.
