

Name and Address

For the attention of the planning officers.

As a resident of Emsworth House Close I am writing to object to the applications

Ref: APP/24/00245

Ref: APP/24/00232

This is a small piece of land which will require dropped kerbs to access the houses, this will reduce the available parking spaces on the street which are already limited. Parking is a big issue where residents and visitors struggle to park near to where they live. Quite a few residents require support from care staff who also need to be able to park. On this note emergency vehicles already have difficulty so if we have a construction site their access will become even harder.

People who are in ill health need to have the opportunity to rest, a construction site will be noisy and may further complicate existing health conditions.
