FAO the planning officers.

APP/24/00245 and APP/24/00232

As a resident of Emsworth House Close I would like to give notice to the council of my objection to BOTH planning applications referenced above. This is to avoid any confusion that the developer appears to have tried to cause in the application process.

Our close is narrow with limited parking for the existing residents, many of whom rely on care support and family visits to ensure their health and wellbeing. Construction of any kind on this piece of land will cause risks to the residents, as emergency services already struggle to access and turn within the close.

How does the developer seek to mitigate risks arising from construction? as I have been unable to ascertain this within any of the planning documents.

Many residents have poor mobility, construction sites and the congestion this will cause will only seek to put these residents at higher risk.

Yours sincerely
