Ref: Planning Proposal for both developments at Emsworth House Close

APP/24/00245

APP/24/00232

As a resident of Emsworth House Close I am writing to inform you formally of my objection to both proposed dwellings.

Any construction will only serve to exacerbate the current parking issues we have. People with mobility scooters already have difficulties with dropped kerbs being partially blocked and unsafe crossing of the road.

Any development will inevitably cause issues with further traffic and parking in both and following the construction phase.

Emergency services already experience problems with accessing and turning in the close, which needs to be seriously considered.

It is also questionable as to why the developer has submitted two different applications, one being for a house and the other for a dwelling.
