RECEIVED

FOA - The planning officer

As a resident of Emsworth House Close I am writing to strongly object to the applications of both developments identified below.

Ref: APP/24/00245

Ref: APP/24/00232

This piece of land will require further dropped kerbs to access the houses, which will reduce the available parking spaces on the street which are already limited.

Parking is a big issue where residents and visitors struggle to park near to where they live.  who also need to be able to park. On that note emergency vehicles already have difficulty so if we have a construction site the access will become even more difficult.

And as I am sure many other residents have expressed their concerns over access for emergencies, such as ambulance and fire services who are in regular attendance!
