FAO the planning officers– Havant Borough Council

Objection to both applications - APP/24/00245 and APP/24/00232

Firstly, I and many other residents would like clarification as to why the developer has put in two applications for the same piece of land? Is this to avoid the overcharge applied to sale of the site or in the hope that as older people we would not realise that the applications were separate and would only object to one?

As a resident of the close I can confirm we have an ongoing issue with parking, many have to park in other roads which is not ideal. Carers and family struggle to park or to pick people up or drop them off safely. Only last week I observed the fire engine trying to reverse back down the close after being called out.

How are the risks to access for emergency services going to be assessed and mitigated during the construction phase of the proposed development? How will they ensure the safety of the residents

These are major issues but also ongoing parking issues following any proposed construction as we lose further parking spaces in the street. I therefore object to both applications and hope that the council will do the right thing here and consider the safety of the existing residents of the close.

Yours sincerely
