

「Our ideas for
your project」

「Company & Philosophy.」

**Holistic approach – the three focal points
of our corporate philosophy:**

**Our label
for a better
environment:**

The mark of
responsible forestry

「Nature & Environment」

The protection of nature
and the environment has
maximum priority for us.

「Play & Movement」

The focus is on people:
their physical and mental
health.

「Responsibility & Service」

The quality must be right
– this applies to products,
services and advice.

		Installation: Scope of Works Site Preparation: Set up a secure compound and install herras fencing around the main work area. Prepare the designated area for equipment installation, including any agreed landscaping or levelling Foundation Work: Excavate the ground to the required depth for foundations to support the playground equipment. Manage the removal of excavated earth from the site efficiently Equipment Installation: Install all designated playground equipment according to project specifications. Ensure all installed structures are thoroughly stable and secure. Baseworks Execute base works according to specification Safer Surfacing Lay grass grow through safer matting with stabilising mesh as per specification Install the required thickness of Bonded Rubber safer surfacing mulch on a newly laid stone base, integrating edges into existing soft landscaping along the perimeter Quality and Safety Inspection Review and inspect the playground equipment to ensure compliance with the EN1176 safety standard Prepare and stage the site for an independent safety inspection to verify installation integrity and safety protocols Site Clean-Up Inspect the site thoroughly and clear any remaining debris or construction materials Maintain a clean and orderly site throughout the project and upon completion Demobilisation: Remove all construction plant, waste, and welfare facilities upon project completion to leave the site in good condition
