

1st October 2025

Dear Sir/Madam

We formally object to planning application APP/21/01350. We are residents of The Oysters estate and the above mentioned proposal is fundamentally flawed on legal and highway grounds.

1. **Flawed Legal Access:** Billy Road is a private road. The Developer has not secured the necessary legal right of way to access for this additional development and in fact the developer has not even bothered approaching management of The Oysters .
2. **Alternative Public Access:** Viable alternative access exists via Charleston Close or Furniss Way (Council-adopted roads). No justification has been provided for proposing to use our narrow winding private road. Billy Road's width is only 5.3-5.5 metres whereas Furniss Way is 6.5 metres wide and is eminently more suitable access.
3. **Unacceptable Traffic Burden:** The calculated 143 additional daily car journeys are unsustainable and pose a severe safety risk for our narrow private road. The Oysters has many young families with numerous children and their safety would be severely compromised with the increased traffic burden. Especially with the initial heavy goods and industrial vehicles using Billy Road whilst the properties and under construction.
4. **Unfair Maintenance Costs:** The plan fails to prove any funding or provision for the significant increase in wear and tear on our private road, unfairly shifting repair costs to the existing residents.
5. **Havant Local Plan:** It is understood that no further development should occur on Hayling Island due to flood risk to the infrastructure.

Without a clear and legally sound plan to resolve the issues of access and maintenance funding, the application must be rejected.

Yours faithfully
