

Hi Arleta

We are still faced with the loss of an important tree – Hybrid Black Poplar BS 5837 B Category (T27) facing onto College Road along with T8 is also a Cat B tree but this tree is less important in terms of public amenity. All other proposed tree removal are of low quality trees that are not consider a constraint in line with *BS5837: 2012 (Trees in relation to design, demolition and construction - Recommendations)*.

I can not support the loss of T27 as it is very visual and contributes well to the street-scene and raise objection.

However, the determination of this application lays with the decision makers in terms of the importance of the scheme and housing need in the Borough.

Should the application be permitted then I would suggest the following condition:

The development hereby permitted shall only be carried out in accordance with the *Arboricultural Impact Appraisal and Preliminary Arboricultural Method Statement and tree planting plan (Reference ACD March 2025) and British Standard BS5837: 2012 (Trees in relation to design, demolition and construction - Recommendations)*.

Reason: To ensure the continuity of amenity value afforded by the trees in question and in accordance with policies CS16 and DM8 of the Havant Borough Core Strategy (2011) and the National Planning Policy Framework.

Thanks

J
