

Dear Kayleigh,

Thank you for consulting Environmental Health (pollution) regarding the above discharge of condition application.

Condition 6 parts l and m.

I have reviewed the Enerveo Street Lighting drawings numbered EVO20035026-LD-001 and EVO20035026-LD-002I am satisfied the information is sufficient to discharge part l of the condition - regarding street lighting.

Part m requires details of external lighting. No information regarding external lighting other than street lighting has been submitted. The applicant is therefore required to provide details of any external lighting to be mounted on or around the proposed dwellings or submit a statement advising that no such lighting is proposed.

Kind regards

Craig Milligan
