7 Planning Considerations

7.1 Having regard to the relevant policies of the development plan it is considered that the main issues arising from this application are:

Whether the degree of pruning works requested would undermine the amenity value of these trees and whether this could also be harmful to their ongoing health and vitality.

7.2 My recommendation relates specifically to assessing the proposed works rather than generally considering the tree's health and condition in any great detail and deals with the relevant issues that have been raised on site and in the application form. The recommendation made within this application is formed from a desktop based examination in line with BS 3998.

The works applied for in this application are for the management of two trees - to abate direct damage and to meet common law rights. Both works descriptions are considered reasonable practice in this instance and will not detriment either the health of the trees or their public amenity value.

8 Conclusion

Recommend permit

9. RECOMMENDATION:

That the Executive Head of Place be authorised to Approve with Conditions application APP/25/00790
